NEWS

---

C-GN-SP-474

**Date:** May 23, 2012  
**To:** Goodman® and Amana® Brand Sales and Distribution  
**From:** Gary Clark - Senior Vice President of Marketing  
**Subject:** Use of Unapproved Refrigerants

Goodman completes extensive reliability testing on any refrigerant used in our products. Currently, our products are designed to use either R-410A or R-22. The approved refrigerant (either R-410A or R-22) is designated on the rating plate of each product we manufacture.

In servicing any Goodman or Amana brand unit, use of any refrigerant neither identified on the unit's rating plate nor otherwise approved by Goodman is improper. Goodman will not be responsible for any repairs or damages associated with such improper servicing.
