

AC ELECTRICAL SYSTEMS OPERATION CLASS

This course will instruct from what electricity is, how meters are used to measure the values, what components are used, how they are wired and how they work. Upon the completion of this course students will have a strong knowledge of electricity, safety of electricity, use of measuring tools and wiring of AC systems.

This course will help prepare for the EPA section 608 and the NATE exam. For details, please contact Elise Fasnacht, x1119 or efasnacht@hvacdist.com. This course also counts for NATE hours.
