

Reading Electrical Diagrams

Objective:

This course will give you the ability to read through a schematic obtaining an operational understanding, also the ability to troubleshoot. The diagrams will be on a multitude of equipment, gas, oil, heat pumps, roof top, along with AC split systems, to name a few. Learning the symbols, switches, circuits, types of diagrams, along with components all included in the various systems.

This course will help prepare for the EPA section 608 and the NATE exam. For details, please contact Elise Fasnacht, x1119 or efasnacht@hvacdist.com This course also counts for Nate hours.
